Experience

07/2014–present Jitterbit San Diego, CA (Remote)

Joined Jitterbit in its early startup days to convert the company into a Gartner MQ Leader and to guide it through several investment rounds with 5x growth. Managed direct mutual product partnerships with Fortune 500 companies such as Salesforce and Autodesk. Lead entry into new markets and established new product lines, most notoriously the API Platform, as well as OData and JMS Connectors. Oversaw strategic customer relationships and provided external technical architectural and security guidance to modern multi-national backbone companies: ABSG, GGP, Odyssey Logistics, Optiv, Skullcandy, Keysight, Behr, four51, Kingspan, others. Lead and established several prominent departments and processes for many others, ie Product Management department, Security Committee, Site Reliability team.

VP Technology and Chief Architect

- Serve as the technical and architectural visionary for the company
- Deliver guidance on the best technology practices and thought leadership in helping shape technology direction for the future
- Act as Chief Evangelist of company's offerings and technologies for customers, prospects, and overall market
- Lead and review architectural and R&D initiatives for new and refactored products
- Support marketing and sales with key clients and major international conferences
- Mentor and provide expertise to other members of IT groups

VP Engineering

- Oversaw a 40+ engineering team responsible for all product development activities
- Formulated strategic objectives and delivery
